Definition of Coptic Language

The Coptic Language is the name used to refer to the last stage of the written Egyptian language. Coptic should more correctly be used to refer to the script rather than the language itself. Even though this script was introduced as far back as the 2nd century BC, it is usually applied to the writing of the Egyptian language from the first century AD to the present day.

If you want to read more about the history of Coptic Language please visit this site:
